PROFESSIONAL EXPERIENCE

Komodo Health, Inc. | New York, NY

Senior Solutions Architect IV

April 2024 – Present

- Developed 3 applications to reduce administrative burden on the Solution Architects using Cursor and Claude AI tools
- Created 3 technical AI agents to help reduce implementation SLAs for Komodo's product suite
- Served on Komodo's AI Council on the Adoption & Enablement Team, driving organization-wide initiatives to help employees integrate AI tools and workflows into daily operations
- Spearheaded the on-time implementation of both standard and custom Komodo solutions across 50+ client engagements
- Automated 15 ongoing client deliveries by creating bespoke Python scripts, reducing operational processing time by 40 hours monthly
- Led the onboarding and mentorship of new Solutions Architects, accelerating their path to self-sufficiency within 3 months

Senior Solutions Architect III

June 2022 – March 2024

- Implemented standard and customized Komodo products for over 20 client engagements
- Produced implementation process guidelines and videos for 4 Komodo products resulting in a 50% decrease in deployment time
- Developed Snowflake Procedures and Tasks to automate dynamic data deliveries significantly reducing manual execution efforts

Rivory Technologies Inc. | New York, NY

Lead Solutions Architect

May 2021 – May 2022

- Engineered 50+ end-to-end ETL workflow templates to help clients move data between API endpoints and data warehouses
- Strategized future product features, updates, and directions for the self-service solutions area of the Rivory platform
- Conducted best practice and use-case specific webinars/demos for prospective clients with the Sales and Marketing teams
- Analyzed product usage data to increase client engagement and convert free-trial accounts to paid subscriptions

Curinos Inc. (formerly Novantas) | New York, NY

Data / Client Services Manager

July 2020 - April 2021

- Collaborated with cross-functional teams of engineers and product managers to develop continued enhancements to the platform
- Trained and managed a team of technical analysts through 10+ new client installations
- Supervised 4 analysts' workload for 27 different clients through the project management tool Asana
- Conducted daily code reviews on complex SQL scripts before deploying to client-facing databases

Senior Data & Configurations Analyst

April 2019 - June 2020

- Developed an ETL framework to migrate data from SQL Server to an integrated Big Data Server
- Served as a technical resource for project management and client success team members
- Architected and integrated automated T-SQL procedures to ensure prompt delivery by reducing processing time from weeks to hours

Data & Configurations Analyst II

November 2017 - March 2019

- Configured and implemented complex T-SQL functions, views, stored procedures, and batch jobs across 10 client databases
- Created Tableau dashboards assist clients' decision-making and problem-solving processes

Data & Configurations Analyst I

August 2016 - October 2017

- Maintained PriceTek Deposits platforms and databases for 5 legacy clients
- Analyzed client-specific data sets with millions of records using T-SQL and PL/SQL

Accenture PLC | New York, NY

Website Redesign Project – UI Business Systems Analyst

March 2015 - May 2016

- Defined information architecture of user interface components based on user stories and wireframes for 4 scrum teams, while collaborating with developers and product owners to understand new features and recommended strategies and solutions

Marketing Execution Project – Data and Taxonomy Analyst

August 2014 - February 2015

- Created a standardized marketing taxonomy across 5 lines of business, driving significant consolidation (>33% reduction) of marketing data fields by leading effective client facing meetings and workshops with VPs and managers

EDUCATION

University of Wisconsin - Madison, M.S. & B.S. Industrial & Systems Engineering

May 2014
